Our Mission

We are at Metco to supply our customers the highest level of quality construction product at fair and market competitive prices. To ensure the longevity of our company through repeat and referral business achieved by customer satisfaction in all areas including timeliness, attention to details and service- minded attitudes. To maintain the highest levels of professionalism, integrity, honesty and fairness in our relationships with our suppliers, subcontractors, professional associates and customers. To be the preeminent provider of superior construction product by consistently improving the quality of our product to add value for clients through innovation, foresight, integrity and aggressive performance; and to serve with character and purpose that brings honor to god.

07	Dry Shrinkage	%	0.10% Max
08	Moisture Movement	%	0.09 Max

* We strickly follow IS:2185 Quality Standard in the manufacturing of blocks.

Hollow Blocks

Sr. No.	Particulars	Units	Values
01	Size	Inch	9" x 4" x 3" / 9" x 4" x 6"
02	Size Tolerance	mm	+/-3
03	Compressive Strength	kg/cm2	50-70
04	Water Absorption	%	10% Max
06	Dry Shrinkage	%	0.10% Max
07	Moisture Movement	%	0.09 Max

* We strickly follow IS:2185 Quality Standard in the manufacturing of blocks.

Flyash Bricks

Benefits of Solid Blocks & Hollow Blocks

Energy Efficient

Advantage of Hollow Block

Hollow block doesn't allow external heat to enter the internal part of room. Hollow concrete block have good insulating properties against sound, heat & dampness.

Fire Resistant

Blocks are suitable for use in areas where fire safety is recommended. As these blocks are fire resistant from 2 to 6 hours depending on the thickness of the wall.

Pest Resistant

The pest resistant properties (as the blocks are made of inorganic materials) of Concrete block keeps termites away, avoiding damages and losses.

Sound Insulation

Having a commendable STC (Sound Transmission Class), Concrete block elements are appropriate material for wall construction

Earthquake Resistant

The manufacturing process gives the block's commendable strength, maintaining its weight property due to which the steadiness of these blocks in buildings is more reliable, making it earthquake resistant and giving it a longer life.

Water Saver

For the curing process of Concrete block walls, there is no need to water the blocks, only the mortar joints need to be cured with water saving the water consumption.

Flyash Bricks Benefits

Limits as per IS-12894-2002 RA 2017

Characteristics	Compressive Strength	Water Absorption	Wastage	Eco Friendly
Flyash Bricks	 70-120 kg/cm ²	 15-17%	 1%	 Yes, Uses Fly Ash, No Chimney Required
Red Brick	 30-60 kg/cm ²	 17-22%	 3-4%	 No, Uses Fertile Soil, Chimney required

Shot Blasted Combi Tiles

35mm / 60mm / 80mm Thickness

Combi Shot Blasted Paver
(200 Series) (35mm Thick)

Combi Shot Blasted Paver
(200 Series) (60mm Thick)

Combi Shot Blasted Paver
(150 Series) (35mm Thick)

Why Shot Blasting ?

Shot blasting adds premiumness to pavers by adding a rough texture on the surface that is lauded by designers worldwide. It emulates the natural appearance of a rock. Shot blasted pavers also provide immense grip to the surface making it anti-slippery. More importantly, the texture is visually appealing.

Kerbstone

A symbol of top quality, high strength and durability. Super Kerb Stone also imparts great aesthetic appeal to the exteriors. Kerb Stone can be used as dividers, on sidewalks, or as copings. Super Kerb Stone comes with a pimple finish and can be made available in different colours.

Specification of Kerb Stone as per IS 5758 : 1984

Dimensions Tolerance

Length + 3mm

Width +1.5mm-3mm

Thickness +3mm

Water Absorption < 8% (After 24 Hours)

Half Batter (HB) - Most frequently used shape, for deflection of traffic and safety of pedestrians

Bull Nose (BN) - To provide access to vehicles from carriageways to a crossing point across the carriageway

Full Batter (FB) - To allow to climb over the footway

Rectangle (RE) - Used as flush kerbs - To provide restraints at FFL

Full Batter Kerb

Half Batter Kerb

QUALITY SPACERS FOR SUPERIOR CONSTRUCTION

an ISO 9001:2015 Certified Company

METCO is the pioneer in introducing concrete spacers (also known as cover blocks) in India.

Over the years METCO has become benchmark of high quality in fibre reinforced concrete spacers / cover blocks.

With multiple tests conducted at reputed domestic and international test labs, METCO cover blocks have been approved and used in various prestigious projects.

**SINGLE COVER SPACERS /
COVER BLOCKS**

Single Cover Spacers / Cover Blocks are the most basic form of spacers in use. Easy to install and identify.

Most economical option amongst all.

**MULTI COVER SPACERS /
COVER BLOCKS**

Multiple Cover Spacers / Cover Blocks are widely used for infrastructure and precasting works.

Recommended for projects to control inventory

**HEAVY DUTY SPACERS /
COVER BLOCKS**

Heavy Duty Spacers / Cover Blocks are used in members with very high reinforcement load e.g. Heavy Rafts or Footings.

Ideal for high reinforcement loads due to their high breaking load rating.

Why Concrete Spacers ?

Why spacers (cover Blocks) are a must in R.C.C. Structures

Spacers help maintain proper cover to the reinforcement bars. Proper cover is essential as

- It provides protection from external environment to rebars against corrosion
- It ensures adequate bond area so that stresses from concrete are transferred to steel
- It delays softening of rebars due to high temperature in case of fire

Sr. No.	Cover Size	Max. Permissible Rebar Dia.	Min. Breaking Load	Packing per Bag
